

BELIEVE BETTER: FEEL & DO BETTER

**Brain Health Assessment – Help
Your Brain, Help Your Life**

BRAIN HEALTH ASSESSMENT

Our brains are incredible, but when was the last time you consciously thought how to help YOUR Brain's health? By understanding how we treat that most amazing organ our brain, you can gain huge awareness in starting to own your brain health for the better. Help yourself believe better so you can feel and do better.

Trella Davis

Reverend, MBA & Transformational Healer

Brain Health Assessment

Alternative healing is sometimes more powerful, faster and more effective than current common Western medicine or Big Pharma offerings can currently provide. I help you understand the “core belief” behind what is manifesting physically, mentally, emotionally, behaviors, experiences, relationships, etc. I help my clients believe better so they can do better. Contact me with questions to see if working together is a fit!

For each section totals of “3” or “4” answers consider the following: 5 questions = Highly probable, 3 questions = Probable, 2 questions = Possible to look into this area for further help/support

This test is not intended for diagnosis or medical treatment purposes.

_____ 1 – 10 Prefrontal cortex (PFC) possible issues

_____ 11 – 20 Anterior cingulate gyrus (ACG) possible issues

_____ 21 – 30 Deep limbic system (DLS) possible issues

_____ 31 – 40 Basal ganglia (BG) possible issues

_____ 41 – 50 Temporal lobe (TL) possible issues

_____ 51 – 60 Memory possible issues

_____ 61 – 70 Cerebellum (CB) possible issues

Having combinations or more than 1 area with possible issues is a common problem. There are lots of remedies that can help you improve your brain health and brain health behaviors. To learn more how you can help yourself and re-program the old beliefs that are driving your poor brain health behaviors learn more: <https://www.accessyouranswers.com/book-a-session1.html>

_____ 71 – 73 **Insomnia.** If you answered one or more of these questions with a score of “3” or “4” you may be struggling with insomnia. There are a lot of reasons for insomnia, we have been able to help clients make huge improvements in consistent quality sleep:

<https://www.accessyouranswers.com/book-a-session1.html>

_____ 74 – 76 **Sleep Apnea.** If you answered one or more of these questions with a score of “3” or “4” you may have sleep apnea. Sleep apnea occurs when people stop breathing multiple times during the night. It causes significant oxygen deprivation for the brain and people may often feel tired, depressed, and have memory issues. This condition is best evaluated by a sleep expert in a specialized sleep laboratory. Treating sleep apnea often makes a positive difference in mood and energy. If you suspect a problem talk to your physician.

_____ 77 – 80 **Hypoglycemia.** If you answered three or more questions with a score of “3” or “4” low blood sugar states should be evaluated by your physician. Low blood sugar or hypoglycemia can cause symptoms of anxiety and lethargy. Eating four to five small meals a day, as well as eliminating most of the simple sugars in your diet (such as sugar, bread, pasta, potatoes, and rice) can be very helpful to balance your mood and anxiety levels. Getting your food behaviors helping your brain and your body changed can be difficult; get support and get new answers that are based on your specific learning style, needs, life and background: <https://www.accessyouranswers.com/classes1.html>

_____ 81 – 87 **Scotopic Sensitivity Syndrome**. If you answered three or more questions with a score of “3” or “4” you may have Scotopic Sensitivity Syndrome (SSS). SSS occurs when the brain is overly sensitive to certain colors of light. This can cause headaches, anxiety, depression, problems reading, and depth perception issues. Getting this condition properly diagnosed and treated can make a significant difference for your mental and physical health. To learn more about the diagnosis and treatment of SSS go to www.irlen.com.

_____ 88 **Cravings**. If you answered this question with a score of “3” or “4” cravings may be a problem. Improving your hydration and getting your food behaviors helping your brain and your body changed can be difficult; get support and get new answers that are based on your specific learning style, needs, life and background: <https://www.accessyouranswers.com/classes1.html>

_____ 89 **Seasonal Mood Disorder**. If you answered this question with a score of “3” or “4” you may have a seasonal mood disorder. Getting outside during daylight hours can be helpful, along with sitting in front of special “full spectrum light therapy” devices for thirty minutes in the morning. See <http://www.mayoclinic.com/health/seasonal-affective-disorder/MH00023> for more information.

_____ 90 – 103 **Bad Brain Habit Questions**. For these questions **add up your total score**, not just the ones you answered 3 or 4.

Brain Health SCORING

If you score between 0 – 6 then odds are you have very good brain habits. Congratulations!
If you score between 7 – 12 odds are you are doing well, but you can work to be better. If you score between 13 – 20 your brain habits are not good and you are prematurely aging your brain. A better brain awaits you. If you score more than 20 you have poor brain habits and it is time to be concerned. A brain makeover may just change your life! Supplements, diet, exercise, meditation, positive social interactions/relationships all can help improve your brain health. If you want to work on believing better so you can then help yourself EASIER, then set up your free call with Trella to take ownership of your life and wellness back- <https://www.accessyouranswers.com/book-a-session1.html>
